Ashish Bhandari
Front-end Developer

bhandariaashish54@gmail.com   9868636643   [LinkedIn](#)   [Github](#)   Kathmandu, Nepal

Passionate frontend developer with a growth mindset, strong ownership, and a drive for continuous learning. Thrive in challenging environments and consistently deliver high-quality solutions under pressure.

Experiences:

14 FEB 2025 - current
Junior Software Developer & IT Support, IT Department, Lucky HR Solution Pvt. Ltd. Jawlakhel , Lalitpur . Nepal

Migrating legacy system from Laravel to modern stack using React (public site) and Next.js (dashboard). Implemented features using libraries like Axios, TanStack Query, Zustand, React Hook Form, Yup/Zod, MUI, and React Router DOM for optimized performance and state management.Implemented Client side authentication based on access and refresh tokens.

14 MAR 2024 -15 JUNE 2024
Frontend Developer Internship, Saigar Group Pvt. Ltd. Nepalgung-06 Fultekra, Banke, Nepal

Assisted in developing and maintaining web applications using React. Gained hands-on experience with component-based architecture, REST APIs, and state management tools while collaborating in an Agile environment.

Education:

October , 2024
Bachelor of Science in Computer Science and Information Technology, Tribhuwan University, Banke Bageshwori campus.

2018
+2 Science, NEB, Gyan Jyoti Higher Secondary School.

Skills:

Technical Skills: JavaScript, TypeScript, HTML, CSS,
Framework: Next.Js, Tailwind css

Libraries: React.Js, Axios, Tan stack Query, Zustand, React-hook-forms, Zod, Yup, Material UI, React-router-dom.

Version Control: Git, Github

Personal Projects:

React E-commerce: (View Live demo)
Uses: react, zustand, react-router-dom, axios, react-tostify.

Developed a fast and responsive e-commerce application using React and Vite. Implemented Zustand for efficient cart state management and Axios for optimized API data fetching. Utilized React Router for smooth multi-page navigation. Focused on delivering a seamless user experience with clean and modular code.

Game Hub: (View Live Demo)
Uses: react, chakra ui, react-router-dom, axios.

Built a game discovery web app using React, TypeScript, React Hook Form, and chakra UI. Created a modular HTTP service with Axios for efficient API integration. Designed reusable components with props and state, and implemented form handling for dynamic search and filter functionality.

React-to-do app: (View Live Demo)
Uses: react, react-hook form, zod, state and props, useState

Developed a React-based to-do application with full CRUD functionality. Used the useState hook for state management and implemented task status handling for Pending, Active, and Completed items to enhance task organization and user experience.
